Calefy – *Student Developer* May 2020 – July 2020
Calgary, Alberta, Canada

Major Achievement: Took ownership of creation and implementation of dynamic grouped slider components. Addition of this component to the software codebase brought the startup closer to MVP.

- Leveraged React, Informed, and Material UI in the development of custom, reusable JavaScript components, expanding the scope of options in the dynamic form builder application
- Collaborated in live component usability testing and evaluation from marketing team to confirm integration of developed components
